

B2  
26. (Amended) A transparent conductive film for use in a transparent touch panel according to Claim 19, wherein given a center line depth  $R_p$  and a maximum roughness  $R_{max}$  with respect to the surface shape, a parameter  $R_p/R_{max}$  representing the surface shape is set to 0.55 or less, whereby a cross section of grain aggregates forming the surface shape is formed into a trapezoidal or rectangular shape.
